

Kiwiflora *our genetics · your growth*

Pavlova

This stunning, non-invasive dwarf Agapanthus features long-lasting, large white flowers. Nestled neatly on top of the foliage the flower heads form rounded candelabras full of brilliant white blooms. Balanced on sturdy stems 'Pavlova' blooms are ideal for taking back to the house as a cut flower and are around all spring and summer. Easy to grow and drought hardy. This is a low fertility variety that does not set seed. Evergreen.

SIZE	H 0.6m x W 0.6m
BLOOM TIME	White low fertility
FOLIAGE	Green
HABIT	Compact and clumping
PROPAGATION METHODS	TC and divisions
HARDINESS	Heat tolerant
USDA HARDINESS ZONES	Plant variety rights granted
LICENCE	Licence available world wide
PROTECTION STATUS	NZPVR30988, USPP23542
