Can Can (Dance Series)

CORDYLINE BANKSII X AUSTRALIS

Cordyline 'Can Can' (PF100) is a stunning new clump forming Cordyline. The foliage colour sets this variety apart from all other Cordyline. The new foliage comes through with a bright variegation of pink on red. As the foliage matures the variegation changes to cream on green. 'Can Can' and 'Cha Cha' are the only Cordyline that have been bred with foliage that changes colour as it matures. The plants are strong in growth with a good root system. Being a clumping form 'Can Can' is ideal as a container plant. Will also suit any garden situation.

SIZE	H 2m x W 1m
BLOOM TIME	Grown for foliage
FOLIAGE	Variegated
HABIT	Clump forming
PROPAGATION METHODS	TC
HARDINESS	Heat and cold tolerant
USDA HARDINESS ZONES	7 to 10
LICENCE	Licence available North America, Japan and South Korea
PROTECTION STATUS	USPP24,029
