Emerald Star (syn. Broadsword)

CORDYLINE X HYBRID

So-named for its impressive shooting star-like cluster of beautiful green foliage, Cordyline ‘Emerald Star’ adds a decidedly tropical flavor to the landscape. It rapidly grows into a 2m high x 1m wide specimen and produces very large, spectacular flower heads in spring to early summer. Birds and bees flock to the masses of tiny, sweetly scented, flowers to get their fill of nectar. Use as a garden or container specimen, focal point and textural contrast, or to impart a tropical effect on patio and deck areas. Plant in free draining soil, in sun or semi-shade and protected from heavy frost. Low maintenance plant. Evergreen.

SIZE	H 3m x W 1.5m (approx.)
BLOOM TIME	Spring to early summer, scented
FOLIAGE	Emerald green, broad, slightly ascending
HABIT	Upright, single stem when young
PROPAGATION METHODS	TC
HARDINESS	Moderate tolerance
USDA HARDINESS ZONES	9b – 11b
LICENCE	Available worldwide
PROTECTION STATUS	NZPVR32779; EUPBR pending
