## Little Fox

KUNZEA ERICOIDES

Fine and fresh perfectly describe this new Kunzea selection. Kunzea 'Little Fox' is a low growing cultivated variety of k?nuka that naturally takes a beautifully rounded form. The delicate, feathery foliage in crisp green give 'Little Fox' a minimal elegance, especially as the long weeping branches begin to cascade over wall or container edges. Minimal, architectural and contemporary in style 'Little Fox' has a clean aesthetic. 'Little Fox' is perfect in pots, overhanging a wall and wonderful as a ground cover. Easy to maintain, just position on a well drained site, in full sun to partial shade. Evergreen.

<b>SIZE</b>	H 0.5m x W 0.8m
<b>BLOOM TIME</b>	Grown for foliage
<b>FOLIAGE</b>	Crisp green, fine texture
<b>HABIT</b>	Dense, compact, low growing mound
<b>PROPAGATION METHODS</b>	Cutting
