Superhedge

PHOTINIA GLABRA

Glossy bronze foliage and super fast growth give Photinia 'Superhedge' the edge as an outstanding choice for screening and hedges. Vigorous, upright growth is paired with a natural self-branching habit creating a perfectly bushy form with little to no pruning needed. Flushes of long and narrow, weeping foliage add a distinct softness and the beautiful bronze colour puts this Photinia in a class of its own. Its hardy nature, fast growth and ability to make excellent medium to tall hedges of up to 5m, places 'Superhedge' among the best of screening plants. Tolerant of most soil types, light frost, windy, coastal or dry conditions, it is a versatile, low maintenance plant. 'Superhedge' is also perfect in public landscaping and as a large feature shrub in the garden. Best placed in full sun or semi-shade and make sure to provide good drainage as Photinia will not tolerate waterlogged soil. Evergreen.

SIZE	H 6m x W 4m
BLOOM TIME	Grown for foliage
FOLIAGE	Rich bronze-red new foliage
HABIT	Dense, compact large shrub
PROPAGATION METHODS	Cutting
HARDINESS	Tolerant of wide climatic range from frosty, to hot and humid coastal areas.
USDA HARDINESS ZONES	7b - 11
LICENCE	Available NZ
PROTECTION STATUS	Grown under Licence in NZ
