Purple Moon

TIBOUCHINA ORGANENSIS

Tibouchina 'Purple Moon' packs some punch with its brilliant purple blooms. The intense colour combination of deep purple flowers set against the rich velvety green foliage makes for an eye-catching display from late summer right through to autumn and into winter in mild areas. Large, velvety red buds are an added feature of this Tibouchina. An excellent choice for striking containers as well as in garden beds and borders. Grows best in a sunny to semi-shaded, sheltered position, in free draining soil. Protect from frost and fertilise annually with slow release fertiliser. Evergreen.

SIZE	H 1.5-2m x W 1.5-2m
BLOOM TIME	Autumn to winter
FOLIAGE	Velvety textured, dark green
HABIT	Dense, rounded shrub
PROPAGATION METHODS	Cutting
HARDINESS	Protect from harsh winds and heavy frost
USDA HARDINESS ZONES	8 to 11
LICENCE	Available NZ
PROTECTION STATUS	-
