## Dream Seeker

DAHLIA HYBRIDA

'Dream Seeker' is part of the Dream series bred by Dr Keith Hammett of New Zealand, characterised by their stunning double flowers. 'Dream Seeker' has a lovely flower in sunset tones overlaid with a graceful ring of salmon pink petals, contrasted against a dark centre. A dark green to green foliage serves as a nice contrast to these beautiful blooms. 'Dream Seeker' works wonderfully in bright container collections for deck or patio colour, excellent as cut flowers and are stunning in cottage style gardens, mass planted among grasses or anywhere you want to add colour. Best grown in full sun, this perennial will die down in winter and be bursting back into life in spring.

<b>SIZE</b>	H 0.6 - 0.8m x W 0.6m
<b>BLOOM TIME</b>	Summer to autumn
<b>FOLIAGE</b>	Dark green, bronze flushed
<b>HABIT</b>	Tidy, upright, self supporting
<b>PROPAGATION METHODS</b>	TC
<b>HARDINESS</b>	Frost tender
<b>USDA HARDINESS ZONES</b>	6 to 10
<b>LICENCE</b>	Available Worldwide
<b>PROTECTION STATUS</b>	Grown under Licence
