Tuscan Tower (syn. Flavor Master)

LAURUS NOBILIS

Laurus Tuscan Tower (syn. Flavour Master) is a columnar-shaped selection of the mighty bay tree, however rather less proportionate. Its strong vertical form makes it the perfect choice for a pyramidal topiary specimen, sentinels either side of an entranceway, or accents in a potager or herb garden. Leaves can be used fresh or dried, to add a distinctive tea-like flavour to slow cooked dishes. Tuscan Tower is extremely cold hardy and, once established, wind and drought tolerant. Plant in well-drained soil in sun or part shade. Evergreen.

SIZE	H 1.8m x W 0.5m
BLOOM TIME	Early to late spring
FOLIAGE	Dark green, evergreen
HABIT	Upright, columnar
PROPAGATION METHODS	Cutting
HARDINESS	Extremely cold hardy
USDA HARDINESS ZONES	7b - 11
LICENCE	Available Worldwide
PROTECTION STATUS	NZ PVR34679 AUS PBR5023
