## Crown Jewel

GARDENIA AUGUSTA

Masses of richly scented, pure white, double blooms float over dark green foliage not once, but twice a year! Not only does Gardenia Crown Jewel flower twice a year, it is also pest and disease resistant and extremely cold tolerant, hardy down to -18°C. Crown Jewel forms a tidy, compact, low growing shrub that requires little attention. It is ideal for mass planting, adding fragrance to an entrance way, or containers. Plant in sun to semi-shade in well-drained soil (or good container mix) and fertilise in spring. Evergreen.

<b>SIZE</b>	H 0.75m x W 0.75m
