Lighthouse

COPROSMA X HYBRID

An outstanding natural selection discovered on coastal cliffs in northern New Zealand, Coprosma 'Lighthouse' is a tough character that lends itself to low maintenance, low water requirement gardens. Being a coastal dweller, it is also very wind and salt-spray tolerant. Its spreading, compact habit makes it an ideal weed suppressing ground cover. Clean minimalist looks make it a good candidate for contemporary landscapes, where it can also be moulded to any desired shape by close clipping. Also looks fabulous juxtaposed with coloured grasses or as a sole container specimen. Plant in well-drained soil, in full sun, and protect from heavy frost. Trim to the desired shape and / or at least once a year, to maintain a tidy, compact habit. Wind, coastal and dry tolerant, once established. Low maintenance plant. Evergreen.

SIZE	H 0.5m x W 1.0m
BLOOM TIME	N/A (foliage selection)
FOLIAGE	Light green, tight-knit
HABIT	Compact, low spreading shrub
PROPAGATION METHODS	Cuttings
HARDINESS	Cold Tolerant
USDA HARDINESS ZONES	9a - 10b
LICENCE	Licence available worldwide
PROTECTION STATUS	-
