## Mini Mac

COPROSMA X HYBRID

Presenting as a tidy, compact, rounded shrub, Coprosma 'Mini Mac' is a natural selection of New Zealand native Coprosma. As with most Coprosmas, it is typically wind and salt-spray resilient but doesn't take kindly to anything more than a light frost. It is a truly low maintenance, low water, requirement plant - ideal for coastal gardens and containers where it can be clipped into a perfectly tight, architectural, ball shape. Also looks fabulous juxtaposed with red and bronze coloured grasses and highly coloured, bold textured foliage. Plant in well-drained soil, in full sun, and protect from heavy frost. Trim to the desired shape and / or at least once a year, to maintain a tidy, compact habit. Wind, coastal and dry tolerant, once established. Low maintenance plant. Evergreen.

<b>SIZE</b>	H 0.4m x W 0.4m
<b>BLOOM TIME</b>	N/A (foliage selection)
<b>FOLIAGE</b>	Light green, tight-knit
<b>HABIT</b>	Compact, low spreading shrub
<b>PROPAGATION METHODS</b>	Cuttings
<b>HARDINESS</b>	Coastal, wind and drought tolerant
<b>USDA HARDINESS ZONES</b>	8 - 10
<b>LICENCE</b>	Licence available worldwide
<b>PROTECTION STATUS</b>	EUPBR59111
