Everillo

CAREX OSHIMENSIS

Carex oshimensis 'Everillo' is part of the Carex EverColor™ series, a modern ornamental grass range. 'Everillo' is distinctive for its brilliant lime yellow foliage, and is a highlight plant for year round designs. The fine, arching foliage of this decorative grass works as the perfect counterpoint to floral arrangements. Pair with perennials and bulbs to create a dynamic container, use in pots, on roof gardens, in living walls and garden beds for year round colour and texture. As with all the Carex EverColor™ series 'Everillo' is low maintenance and easy-to-grow. Likes to be in moist but well draining soil and grows well in full sun, partial shade and shady areas.

SIZE	H 0.45m x W 0.6m
BLOOM TIME	Grown for foliage
FOLIAGE	Golden yellow
HABIT	Clump forming
PROPAGATION METHODS	TC Division
HARDINESS	Coastal and wind tolerant.
USDA HARDINESS ZONES	7 to 10
LICENCE	Available NZ
PROTECTION STATUS	NZ PVR 32081
