Evolution Colorific

ECHINACEA PURPUREA

Colour galore with Echinacea Evolution Colorific! Aptly named, Evolution 'Colorific' produces a beautiful spectrum of colours ranging from soft yellow and peach through to bright pink shades. These blooms are framed by lush green foliage and detailed with a lively green cone. This prolific specimen will bring an abundant burst of colour to your garden blooming from late spring right through to the end of summer. Wonderful in pots on the terrace, in beds and borders and simply stunning planted on mass. Best planted in full sun and in well-drained soil.
