Lipstick

EUPHORBIA MILII X HYBRID

'Lipstick' is a sensational Euphorbia distinguished by its brilliant bursts of hot pink flowers and exuberant green leaves. Perfect for some vibrant colour to lighten up the end of winter Euphorbia 'Lipstick' blooms regularly from late winter though to the end of summer – often year-round in warmer climates. It's a good choice for pot plants, on a windowsill and in warm sunny spots in the garden. Grows best in well-drained soil and in full or part sun. Fertilise in spring with Controlled Release Fertiliser to maintain healthy, vigorous growth.
