Plum Power

HEUCHERA VILLOSA

Few can resist the charm of Heuchera 'Plum Power'. It catches the eye with arresting, dark leaf markings set against foliage colours that change throughout the year. From burgundy red to an elegant purple-pink, with a hint of silver, 'Plum Power' brings a wonderful range of colour to the garden. The lush foliage can be up to 20 - 25 cm wide and 35 - 40 cm long and from late June, dark pink flowers rise up above the leaves. Beautiful in a feature pot all on its own, but equally stunning in garden borders or mixed containers. 'Plum Power' is resilient, disease tolerant and able to withstand a wide range of weather conditions. It will thrive in all soil types and in full sun, partial shade or shade so grow this versatile plant anywhere you want! Evergreen.

SIZE	H 0.35m x W 0.5m
